Using Video Download Helper

Adding the Firefox plug-in

1. Open up Firefox and go to https://addons.mozilla.org/en-CA/firefox/addon/video-downloadhelper/

2. Press Add to Firefox (if you see "Only with Firefox- Get Firefox now" you are in the wrong browser)
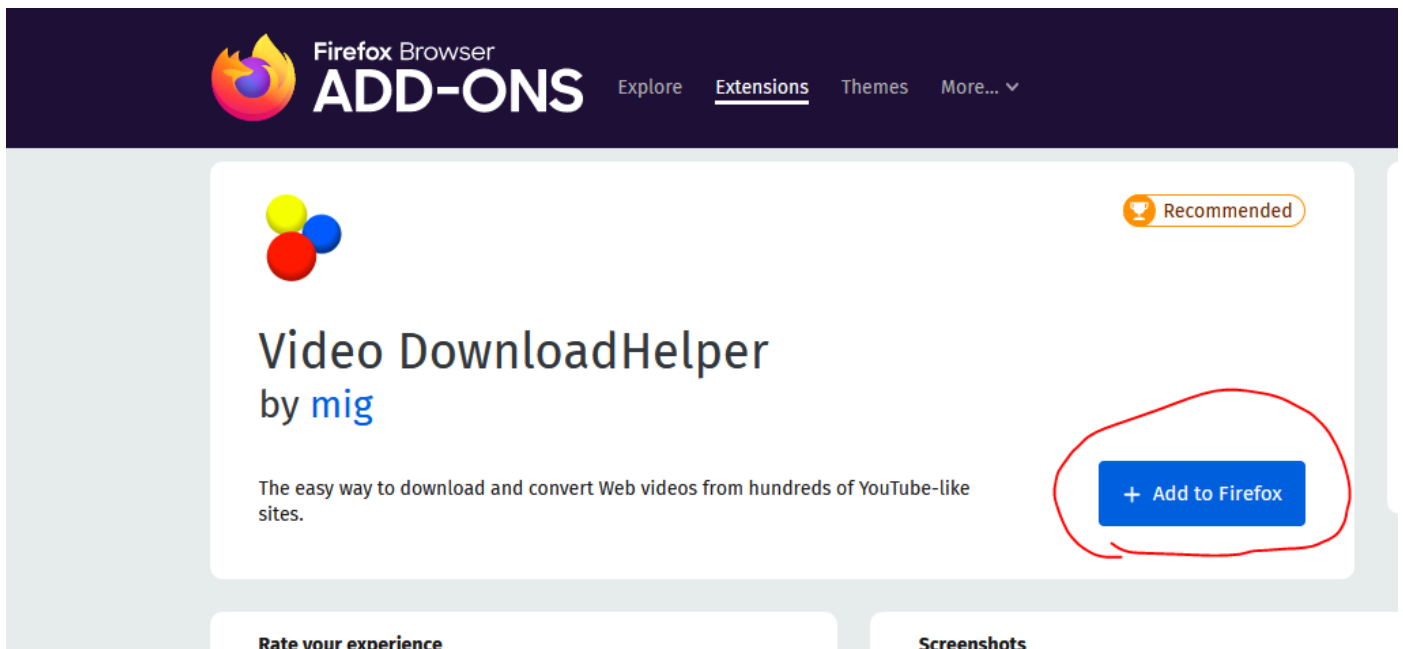

3. A popup will appear, Press Add.

Add Video DownloadHelper?

It requires your permission to:

- Access your data for all websites
- Exchange messages with programs other than Firefox
- Input data to the clipboard
- Download files and read and modify the browser's download history
- Display notifications to you
- Access browser tabs
- Access browser activity during navigation

••• ▶   ⚙

4. Press the arrow and select download

5. Once selected you will see that it is running. To view the progress click on the work running.

6. Here it will give info on how it is going.

7. Once it is done it can be viewed in the default save location. (eg.
C:\users\Johnathan\dwhelper)

Changing the default save location

1. Press on the download helper icon at the top right of Firefox.

2. Press on the gear icon

3. Go to the Behavior tab and press Change

4. Browse to where you want videos to save to. (Press the folder at the top to go up a folder)

5. Once you have browsed to the folder press OK at the bottom right.
